

TransPerfect Studios Helps Epicentro Deliver 9-Language Project Meeting Strict Accessibility Standards

epicentro

Digital agency Epicentro turned to TransPerfect Studios for assistance with localizing audio descriptions, voiceover and subtitles into nine languages for the Hong Kong SAR government. Not only did the recordings have to be completed in-country and within a tight time frame, but the final tracks had to meet strict accessibility standards for the blind and disabled. TransPerfect Studios delivered the project ahead of schedule and all tracks qualified for Web Content Accessibility Guidelines (WCAG) 2.0 AAA—the highest international standard for disability accessibility on the internet.
